## **How Jatco helps you**

### **Full service**

Comprehensive offerings include product design, engineering, tooling, molding, die casting, metal stamping, assembly, painting, packaging, warehousing, distribution and more.

### **Expertise and vision**

At Jatco, old world craftsmanship is combined with cutting-edge technology and a passion to solve the toughest manufacturing challenges.

### **Service passion**

Every employee has instant access to up-to-the-minute project information and a drive to help you succeed. Jatco operates 24 hours a day, seven days a week on two continents.

### **Time to market**

Experience, cutting-edge technology, modern facilities and superior transportation add up to faster delivery. Jatco gets your products to market quickly and efficiently.

# Advantage

**Outstanding value** – State-of-the-art US operations combined with our Hong Kong facility delivers an unbeatable range of services, low prices and excellence.

**Cutting-edge technology** – Multi-shot tools, stack molds, in-mold decorating, clean room and electronic presses are all part of Jatco's cutting-edge technology offerings.

**Facilities** – System redundancy, automated material handling and electronic monitoring ensure exceptional quality and reliability.

**Economy and efficiency** – Direct rail line service, bulk resin storage and proximity to one of the West Coast's largest container shipping ports means efficient material sourcing, faster delivery and cost savings.

# Services

**Design and engineering** – Experienced in-house engineers and industrial design, tooling and mechanical engineering specialists can develop virtually any new product.

**Tooling** – Jatco provides in-house tooling to support mold construction, mold maintenance and mold modifications. A fully equipped tooling facility has everything needed, including CNC machining centers, CNC EDM, automated grinding equipment and a full array of standard mold-making machinery.

**Molding** – Over 70 presses, from 28 to 1000 tons, and multi-component capability. All presses equipped with robotics, most with 3 axis servo robot capability to handle the most complex molding operations. Automated material handling, central drying and electronic monitoring.

**Manufacturing** – Jatco offers full, turn-key service, supported by a professional secondary operations department for assembly and decoration. We pride ourselves on our ability to "do it all," including mechanical assembly, electric assembly, ultrasonic welding, pad printing, silk screening, packaging, hot stamping, warehousing and distribution.

**Warehousing and distribution** – With more than 210,000 square feet of indoor storage capacity, 10 dock doors and a dedicated staff to assist in shipping, Jatco moves your product via UPS, Fed Ex, truckload, LTL, air freight and ocean container to any location worldwide, when you need it.

**Quality control** – With services from incoming inspection to final dock audits, Jatco can customize a quality plan to suit the most detailed performance requirement.
